ONE TECH is a range of professional paint tools that meet manufacturing requirements in general and is easy to use for each painter in particular.

ONE TECH is always looking to provide you with the best products that are manufactured at the world's leading plants. That is why we have chosen Prona Air Tool Manufacturing Limited as a manufacturer of our paint tools, as it has more than 30 years of experience in the production of spray guns and related equipment.

A range of products that enables the application of any material was developed especially for **ONE TECH**:

- Base coats, metallic paints, top coats;
- Primers, enamels;
- Thick waterborne paints;
- Ceramic, abrasive coatings;
- Patina, stain.

Strict quality control performed by the manufacturing plant:

- Production of ONE TECH spray guns with the modern European CNC machines;
- A spot check of each batch of the parts that are used in ONE TECH tools;
- 100% of ONE TECH spray guns are tested for airtightness;
- 100% of ONE TECH needles are being hardened;
- 100% check of pneumatic engines of ONE TECH agitators.

Premium spray quality of spray guns ONE TECH by Prona is confirmed by laboratory tests. The patented technologies of the manufacturing plant make it possible to reduce the price and to retain the high quality and reliability of ONE TECH tools.

Spray guns

ONE TECH NT-100

Manual pneumatic spray gun

Description

Light and perfectly balanced pneumatic gravity feed spray gun ONE TECH NT-100 is a universal solution for application of a wide variety of paints, top coats, base coats and primers, and other materials for pneumatic spraying.

Use: automobile, refinish, machine-building, furniture industry and many other industry fields.

Advantages

- Easy to clean and long-life anodized body
- A nozzle, a needle and fluid passages are made of stainless steel
- Wide choice of nozzles
- Perfectly balanced ergonomic body of a spray gun reduces fatigue

Application

Air cap	Nozzle size, mm
LV2	1,2 / 1,3 / 1,4 / 1,5 / 1,6 / 1,8/ 2,0 Base and top coats, primers, enamels
W2	2,5 Paints, primers or putties, very high performance

Technical characteristics

Nº	Part number	Nozzle, mm	Air cap	Pressure, bar	Air consumption, l/min	Material consumption, ml/min	Spray width, mm*	Weight, g
1	NT10-100-G12	1,2	LV2	2,0 - 3,0	320	160	230 - 250	464

ONE TECH NT-101

Manual pneumatic spray gun

Description

Gravity feed spray gun ONE TECH NT-101 shows perfect spraying quality and is particularly suitable for application of transparent and colourless coatings, enamels, primers and metallic paints in the automotive industry and body shops.

It has a wide range of nozzle sizes and two air caps which enables application of almost all types of paints, including the water-borne ones.

Advantages

- Strong aluminium anodized body ensures long service life of a spray gun and facilitates its cleaning and technical maintenance.
- Nozzles and needles are made of stainless steel.
- Reduced misting and a high coefficient of paint transfer to the surface.
- It is equipped with regulators of air supply, of shape and size of a spray pattern and a needle lift adjuster.

ONE TECH NT-103

Pressurized manual pneumatic spray gun

Description

ONE TECH NT-103 is a manual gravity feed spray gun with a pressurized cup. The internal cup pressure is generated by delivering air from the spray gun to the fluid cup. The internal cup pressure can be adjusted with a throttle valve.

This spray gun is a perfect tool for application of such high viscosity materials as structural, zinc-rich and water-base materials.

Advantages

- Strong aluminium anodized body, stainless steel nozzles and needles ensure long service life of a spray gun and facilitate its cleaning and technical maintenance.
- It is equipped with regulators of air supply, of shape and size of a spray pattern and a needle lift adjuster.
- Precise manual adjustment of the internal cup pressure.
- Reduced misting and a high coefficient of paint transfer to the surface.

ONE TECH NT-200

Manual pneumatic spray gun

Description

Light and perfectly balanced pneumatic suction feed spray gun ONE TECH NT-200 is a solution for application of a wide variety of paints, such as top coats, base coats and primers, and other materials for pneumatic spraying.

Use: automobile industry, refinish industry, machine-building industry, furniture industry and many other industry fields.

Advantages

- Strong aluminium anodized body ensures long service life of a spray gun and facilitates its cleaning and technical maintenance.
- Nozzles and needles are made of stainless steel
- It is equipped with regulators of air supply, of shape and size of a spray pattern and a needle lift adjuster.
- Reduced misting and a high coefficient of paint transfer to the surface.

ONE TECH NT-400G

Manual pneumatic mini spray gun

Description

ONE TECH NT-400G is a manual gravity feed mini spray gun for spot repair and painting of small products.

Advantages

- Spray gun body is made of extra strong forged aluminium, its inner surface is fully dense.
- Anodized body, stainless steel nozzles and needles ensure long service life of a spray gun and facilitate its cleaning and technical maintenance.
- Precise control of material feed.
- Cup capacity (150 ml).

ONE TECH NT-400F

Manual pneumatic mini spray gun

Description

ONE TECH NT-400F is a manual gravity feed mini spray gun with a side cup for spot repair and painting of small products.

Advantages

- Spray gun body is made of extra strong forged aluminium, its inner surface is fully dense.
- Anodized body, stainless steel nozzles and needles ensure long service life of a spray gun and facilitate its cleaning and technical maintenance.
- Precise control of material feed.
- Small cup capacity (150 ml).

Technical characteristics

Nº	Part number	Nozzle, mm	Air cap	Pressure, bar	Air consumption, l/min	Material consumption, ml/min	Spray width, mm*	Weight, g

ONE TECH NT-400R

Manual pneumatic mini spray gun

Description

ONE TECH NT-400R is a manual gravity feed mini spray gun with a side cup for spot repair and painting of small products.

NT-400R is a perfect solution for furniture enterprises while working with special effects, applying patina and other decorative materials.

Advantages

- Spray gun body is made of extra strong forged aluminium, its inner surface is fully dense.
- Anodized body, stainless steel nozzles and needles ensure long service life of a spray gun and facilitate its cleaning and technical maintenance.
- Precise control of material feed.
- Small cup capacity (150 ml).

ONE TECH NT-R-77-S

Manual pneumatic spray gun

Description

Suction feed spray gun ONE TECH NT-R-77 is designed for application of multicolour decorative materials.

It is suitable for production of panels for internal and external finishing of the facades of a building as well as for onsite painting of the walls.

Advantages

- Does not damage the structure of the components in the multicolour paint.
- Allows achieving a natural stone effect.
- Strong aluminium body ensures long service life of a spray gun and facilitates its cleaning and technical maintenance.

ONE TECH NT-R-77-Z (CERAMIC)

Manual pneumatic spray gun

Description

Suction feed spray gun ONE TECH NT-R-77 of a traditional spraying system is designed for application of water-base abrasive materials, glaze on the ceramic sanitary ware.

Advantages

- Strong aluminium body ensures long service life of a spray gun and facilitates its cleaning and technical maintenance.
- Nozzle and needle are made of stainless steel with special nitride treatment.
- It is equipped with regulators of air supply, of shape and size of a spray pattern and a needle lift adjuster.

Technical characteristics

AIR DRYER GUN NT-RP-2

Air dryer gun ONE TECH NT10-RP-2 is designed for speeding up the drying process of the surface coated with water-base materials.

Venturi system ensures low air consumption. Air dryer gun by Onetech makes it possible to reduce drying time of water-base paints to 65%.

Part number :	NT10-RP-2
Working pressure, bar:	2,9
Max pressure, bar:	6,8
Air consumption, l/min:	up to 700
Air flow, l/min:	up to 2800
Air inlet thread:	1/4" (M)
Weight, g:	633

STAND ONE TECH WITH TWO AIR DRYER GUNS

The stand makes it possible to install and to use two air dryer guns ONE TECH NT10-RP-2 simultaneously, and each gun may be adjusted and directed at the object accurately.

The stand should be used directly inside the spray booth or the paint area.

Advantages:

- Adjustable position of the stand and the air dryer guns;
- Two air dryer guns NT10-RP-2 is included

Part number:	NT10-RPS-1
Max height, m:	2
Max width, m:	0,8
